

QuantFunda

We are looking for a Python developer proficient in Twisted and Microservices. The candidate should have a deep understanding of the async workflow and the Twisted framework. The candidate should know about blocking and non-blocking functions in the Twisted reactor.

About QuantFunda:

QuantFunda is a bootstrapped Technology start-up providing infrastructure and support for Algorithmic Trading to clients.

Job Description:

Work on various projects assigned which may relate to:

1. Develop and maintain modules related to the Twisted framework, ensuring optimal performance and scalability.
2. Design, build, and implement Microservices that integrate seamlessly with our existing systems.
3. Conduct thorough data analysis to inform infrastructure enhancements and trading strategies.
4. Collaborate with cross-functional teams to deliver high-quality software solutions.
5. Write clean, maintainable, and efficient code that adheres to best practices.
6. Troubleshoot and debug applications to resolve complex issues.
7. Stay abreast of emerging trends in software development and apply them to operations.
8. Write and maintain unit test classes to ensure code quality and reliability.

Location: Hybrid-Mumbai (Full remote work not available for this role. Candidate will be required to work three days a week on location.)

Salary: Negotiable

Must: Python, Twisted, Pandas, Numpy

Good to Have: RabbitMQ, Linux/Unix, REST API
